

<p>We are very pleased to be able to share a new article on the BT Buddies website with you.</p> <p></p> <p>Jeanne M. Wallace, PhD, CNC is widely regarded as one of the most prominent experts in nutritional oncology. She is the founder and director of Nutritional Solutions which provides consulting to cancer patients throughout the U.S. and abroad about evidence-based dietary, nutritional and botanical support to complement conventional cancer care. </p> <p>Jeanne says, 'I have been deeply touched by cancer on a personal level many times throughout my nearly-five-decades long life. I have lost dear friends and family members, been the caregiver to a partner with a GBM IV brain tumor, and nurtured many loved ones on the path of long-term survivorship. My life's mission is to empower those facing cancer...because there are powerful anti-cancer tools at their farmer's market, in their backyard garden plot, in their kitchen, and, hopefully, on their fork! The field of oncology is changing, and there is an emerging understanding of the healing power of foods. We now have the science that explains at the molecular and genetic level exactly how nutrition impacts cancer. My passion is presenting that research to patients and giving them the tools to incorporate it into their daily life.' </p> <p style="text-align: center;">
